

INFRARED THERMAL IMAGER

Compact & Lightweight

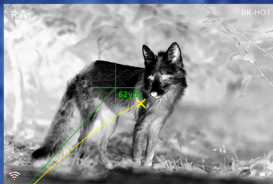

Easy carrying for hunting, best fitting for different rifles.

Ballistic Calculator

The ballistic calculator can precisely calculate the bullet's travel distance and then indicate an auxiliary cross-hair on the side. This helps your accuracy over long distances.

- ▶ Boost your accuracy with smart technology
- ▶ Precise trajectory for long range targets
- ▶ Become a more proficient shooter

Parameters	
Ballistic Data	A
Velocity Wt(m/s)	285
Bullet Wt(g)	0.2
Bullet BC	0.465
Altitude(m)	1220
Temperature(°c)	22
Scope Ht(mm)	64.09
Zero Range(m)	41
Reference Point Shape And Color	
Long press OK to save exit, and long press MENU to exit without saving.	

1200M Detection Range

The volume of the LRF module has been reduced by 70% and the performance has been improved by 50% delivering absolute precision and unrivaled performance in any hunting situation you might find yourself in.

- ▶ Precise target acquisition
- ▶ Faster and sharper focus
- ▶ Long range precision

6 Reticle options 4 Colors

6 reticle options are available for better aiming visibility. You can choose up to 4 different colors. There is support for multi-user personalized settings, when you change your rifle.

12 μ m, NETD \leq 25mK Thermal Image Sensor

PARD
Explore the invisible

- ▶ High image resolution and clarity
- ▶ Strong dynamic capture ability
- ▶ Extremely sensitive

Infrared Image Enhancement Algorithm (IREA)

Image retouch

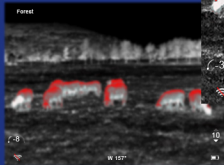

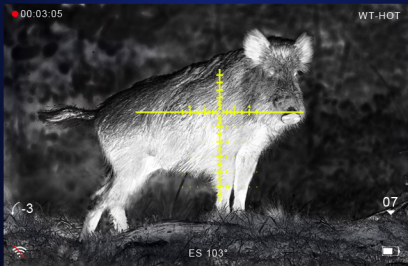

Image retouch

- ▶ Lightning speed processing capability.
- ▶ Exceptional recognition of targets.
- ▶ Correction of image distortion.

Self-activated Recording

- ▶ Intelligent Recording. Record thrilling moments.

By turning on the self-activated recording, the device will automatically record in 20 second intervals when it senses recoil from the shot. The incremental 20-second video footage will be saved on the TF card.

Multi-focal Optional Lens

You can choose different focal lens ranging from 19/25/35/45mm. The small lens is optimal for a wide field of view and the large lens helps the shooter to effectively identify various targets. Experience more comfort when observing targets in different environments.

Flashlight

The 100 lumen flashlight integrated into the device acts as an auxiliary lighting option, helping to illuminate and locate various targets even on the darkest night.

3 Scene Modes

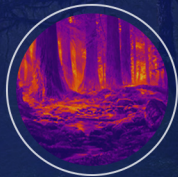

Featuring a quick switch function to choose between 3 scene modes (city/-forest/rain). The image will be adjusted according to the selected scene mode offering exceptional adaptability in different environments.

Forest

City

Rain

More Features

WiFi

Built in Wi-Fi allows you to connect your phone, PC or tablet as an external viewfinder and you can transfer images and videos instantly on the go.

PIP Mode

The top center of the display can show a 2x magnified picture to improve aiming visibility, allowing you to see magnified target details without losing the field of view.

Stealth Mode

Hunt in stealth mode and shoot in total silence. You no longer disturb any animals when you press PARD buttons.

6 Color Palettes

Whitehot / blackhot / redhot / iron hot / edge / sky mode. The user can select the appropriate color palette to adapt to different environments.

Video Recording

Capture and record thrilling moments of your hunting trip and share high resolution images of your outdoor adventures on social media.

IP67 Waterproof

IP67 offers a strong protection even in various severe outdoor environment such as wet and moist weather.
